

“Our open unit for the daily maintenance in warm season grass areas”

The LED30 (Open) is an open unit for the daily maintenance of your pitch. The unit is easy to deploy on areas up to 98ft². When used in pairs it will treat an area of 213ft².

The combination of light, heat, H₂O (the essentials for photosynthesis) enhancement can produce 10 mm of grass growth in twenty-four hours.

The world's first open LED bespoke grass growing technology using SeeGrow's DayLight system along with Parxtra Sound boosters

Formulated for maintaining warm season grasses and biased for rooting

Reduces your Eco Footprint by 200% compared to nearest competition

Lightweight & easily deployable
