

**“Warm Season Grass Intensive Care Unit”**

This unit is an intensive care unit, easy to deploy on hard wearing areas of up to 46ft<sup>2</sup>, specifically made for warm areas and warm season grass with 10 lighting modules instead of 7 (as compared with the LED 14). The combination of light, heat, H<sub>2</sub>O and CO<sub>2</sub> (the essentials for photosynthesis) enhancement can produce 10 mm of grass growth in twenty-four hours, even in winter temperatures.

*“A Patented system which may be the most innovative, effective & sustainable grass growing technology in the world”*

Quick & effective recovery solution for damaged areas

Reduces your Eco footprint by 300% compared to nearest competition
